

How to Install Roller Blinds

If you would like further advice on your actual window, please email a clear digital image to (info@easyblinds.co.nz). Ensure all curtains are moved away from the window and that handles and the full window is in the photo.

You will need:

- Power drill and bit
- Phillips screwdriver
- Pencil

Fig 1

Fig 2

Fig 3

Unpack your blinds & check all the parts on the list. Do not unroll the blinds.

If your blind is to be mounted inside the window, it will be top mounted as in Fig. 1 & Fig .2

If your blind is to be mounted on the architrave it will be face mounted as in Fig.3

Check which side you have ordered for the chain to be on. The chain end bracket looks like Fig. 1 & 3

Place the chain end bracket in position & mark the screwhole positions with a pencil.

Repeat for the other end, making sure that both brackets are the same distance from the front edge of the window frame.

Remove the brackets & drill a hole at each pencil mark. Screw brackets in position.

Pick up the blind & insert the chain winder end into the chain end bracket Fig. 4, making sure the part covering the chain is at the top.

Fig 4

Fig 5

Hold the other end of the blind in position in the bracket and rotate the plastic end until the metal pin pops out as in Fig.5

Your blind should now be in position. Pull the blind down fully and back up fully a couple of times to ensure that the blind is running smoothly.
